TITLE	Evaluation of patients within clinical trial in medical oncology				
PROF	Erika Martinelli				
SCIENTIFIC DISCIPLINARY SECTOR (SSD)	MEDS-09/A				
GENERAL AND SPECIFIC OBJECTIVES (MAX 500 CHARACTERS)	Clinical research in oncology has evolved over the years and thanks to the possibility that the cancer patient has access to phase I, II and III trials, new drugs are being tested with promising results. Thanks to molecular target therapy and immunotherapy, the survival of these patients has increased significantly; however, all this requires more and more a greater knowledge of the mechanisms of action and side effects of experimental drugs.
