

PROPOSAL FOR ELECTIVE DIDACTIC ACTIVITIES (ADE) A.A. 2021-2022

TITLE ADE	General practitioner and digital healthcare: electronic health record and dematerialized recipe				
PROF./ DR.	Dr. Luigi Sparano; Dr. Claudia Pizzi PhD; Prof. Michele Caraglia; Prof. Maria Pavia				
SSD	MED/42 GENERAL AND APPLIED HYGIENE (GENERAL MEDICINE)				
GENERAL AND SPECIFIC OBJECTIVES (MAX 500 CHARACTERS)	The specific objectives of the present interactive seminar are mainly focused on techniques and methods based on innovative software that are presently used by general practitioners belonging to the national healthcare system. The students will gain knowledge and skills from exploratory data analysis, methods and tools for database management and from a broad and analytic vision on the tools for the management, process and presentation of outcomes from clinical and epidemiological data, in an interdisciplinary and integrated context. Moreover, the students at the end of the seminar will be able to use these tools in different application fields such as economic-financial, social, demographic, biomedical and environmental areas.
