

PROPOSAL FOR ELECTIVE DIDACTIC ACTIVITIES (ADE) A.A. 2022-2023

TITLE	21 st Century the era of the new pandemics: The diagnosis and therapy of SARS-Cov-2 infection					
PROF.	Silvia Zappavigna					
SCIENTIFIC DISCIPLINARY SECTOR (SSD)	Interdisciplinary					
GENERAL AND SPECIFIC OBJECTIVES	The teaching activity will cover all the etiological and diagnostic aspects. SARS-Cov-2 will be described in its molecular and taxonomic aspects. The laboratory assays for the detection of the virus with molecular or antigenic swabs, or the search for specific antibodies with serological methods will be discussed together with the imaging of the complications (pneumonitis etc.). Moreover, a general picture of the epidemiology of the disease and of the clinical management of the symptomatic patients will be also given. At the end of the teaching activity a test with multiple answers will be administered to the students (30 questions with 5 answers with only one correct to be filled in 30 minutes with one point of penalties for each extra-minute of time; minimal score to pass is 18).
