PROPOSAL FOR ELECTIVE DIDACTIV ACTIVITIES (ADE)**

TITLE	Management of Klinefelter syndrome: clinical cases presentation			
TEACHER	Prof. Daniela Pasquali			
SPECIFIC OBJECTIVES (max 500 characters)	Klinefelter syndrome (KS), the most frequent chromosomal disorders, remains frustratingly under diagnosed with a remarkable portion of cases being unidentified. Under diagnosis may be due to man's hesitancy about seeking medical counselling, low awareness of KS among health professionals, and failure by health professionals to perform routine genital examinations in adult men. Some aspects described in the textbooks are obsolete and need a re-evaluation. Here we will discuss different KS clinical cases to give the tools to perform a correct diagnosis, and management of this condition.			
	ACTIVITY TYPE	CHECK	HOURS	CFU
	INTERACTIVE SEMINAR		≥ 5 up to 10	0,5
YEAR PERIOD	2020			
MAXIMUM N. OF STUDENTS	25			
YEAR/SEMESTER	IV YEAR 2019/2020 between I and II semester and after the II semester			
PRIOR KNOWLEDGE REQUESTED	Exam of endocrinology			
LOCATION	SA4			
FIXED DATES/DAYS	1 day to be defined (19 May 2020) Please contact GIADA GAFFI giada.gaffi@studenti.unicampania.it
