

Didactic activities, exams and access to the University starting from May 1st, 2022

Following the end of the state of emergency on March 31st, 2022 (Legislative Decree 221/2021) and the Decree-law of 24 March 2022, n. 24 "Provisions aimed at favoring the return to the ordinary following the cessation of the state of emergency due to COVID-19", the following is announced:

Green certification and safety measures

The use of COVID-19 green certifications of any type for access to universities is suspended. The capacity of the classrooms returns to 100% values while the obligation to use the FFP2 mask remains.

Frontal didactic activities

Shifts for access to the classroom are suspended based on the ReStart color code. All students will be able to access the classrooms, regardless of the color assigned. The Teams classes will still remain active, especially for courses with a higher number of subscribers.

Exams and graduation

The exam and graduation sessions will be exclusively in attendance without the limitations and exceptions previously adopted. The presence of accompanying persons is allowed, within the limits set by the individual courses of study, also in relation to the capacity of the classrooms.

Only students close to graduation and positive for COVID19 will be able to sit remote exams by forwarding the request to the President of the Commission at least 24 hours in advance by e-mail to his institutional address, attaching the relative non-self-certified documentation. All other students will only be able to take face-to-face exams.

Students with disabilities must contact the CID by e-mail at cid.inclusione@unicampania.it for the preparation of equivalent tests, as already foreseen.
